Edit Jump to: An enthusiastic young doctor happily embarks on his career, but it isn't long before he finds out what being a doctor really entails. Andrew Manson (Robert Donat), a young, enthusiastic doctor takes his first job in a Welsh mining town, and begins to wonder at the persistent cough many of the miners have. When his attempts to prove its cause are thwarted, he moves to London. His new practice does badly. But when a friend shows him how to make a lucrative practice from rich hypochondriacs, it will take a great shock to show him what the truth of being a doctor really is. —Kathy Li Idealistic young Dr. Andrew Manson (Robert Donat) is just beginning his career. He is looking for a balance between fair working conditions and being able to properly take care of his patients. After quitting his initial job in Wales as an assistant to Dr. Page (Basil Gill) due to the unfair working conditions set by Dr. Page's tyrannical wife (Dylis Davies), Manson gets a job working as the doctor for the local mine. Quickly, Manson notices that many of the miners have a persistent cough which had been treated by the previous doctor with "pink medicine". Suspecting that the cough has something to do with the mining conditions, Manson decides to investigate. Without the support of the local hospital, Manson, with the urging and support of his equally idealistic schoolteacher wife, Christine (Rosalind Russell), opens a research facility in their home. Their research does determine that the silica dust from the mine is causing the miners' tuberculosis. However, many of the miners and the miner's board question the need for the research and want Manson to go back to solely prescribing the pink medicine for the cough. Disillusioned, Manson hastily quits and opens a practice in London. After an initial struggle, Manson, with advice from an old colleague, learns that a lucrative career can be had by treating the wealthy whose only medical problems are the want for attention. Money changes Manson's outlook, an outlook not supported by Christine. But a personal tragedy close to the Mansons caused by medical incompetence makes Manson reexamine the path he's chosen in London. —Huggo Dr. Andrew Manson (Robert Donat) has recently qualified as a physician and accepts a position as an associate with an existing practice in a Welsh mining village. He is appalled not only at the conditions he finds there but also with the way health care is delivered. He finds himself to be the only working doctor in the practice, but most of the income goes to the elderly physician who contributes nothing. He also finds typhoid to be rife, but a local town council that will do nothing to improve the water supply. Something he and a colleague, Dr. Philip Denny (Sir Ralph Richardson), are quite prepared to deal with in a unique way. In the end, he is forced to leave the community when his experiments into work-related illnesses is misunderstood. His attempt to establish himself in London is a challenge but a chance meeting with a colleague, Dr. Frederick Lawford (Sir Rex Harrison), sets him up nicely with the elite of British society. He finds that the practice of medicine is filled with incompetents, hypocrisy, and deceit. —garykmc It looks like we don't have a Synopsis for this title yet. Be the first to contribute! He struggles against a system that seems to value money more than curing illness. But the system is extremely powerful. Will he win his battle? Download Teacher's ResourcesDownload Sample Audio Paperback Availability: In stock Buy From Amazon "Cronin's distinguished achievement...No one could have written as fine, honest, and moving a study of a young doctor as The Citadel without possessing great literary taste and skill." —The Atlantic MonthlyA groundbreaking novel of its time and a National Book Award winner.The Citadel follows the life of Andrew Manson, a young and idealistic Scottish doctor, as he navigates the challenges of practicing medicine across interwar Wales and England. Based on Cronin's own experiences as a physician, The Citadel boldly confronts traditional medical ethics, and has been noted as one of the inspirations for the formation of the National Health Service.The Citadel has been adapted into several successful film, radio, and television productions around the world, including the Oscar-nominated 1938 film starring Ralph Donat, Rosalind Russell, Ralph Richardson, and Rex Harrison. Abstract AJ Cronin (1896–1981) was a Scottish-born doctor-turned-novelist whose most famous novel is The Citadel, published in 1937. The book describes the struggles of an idealistic young doctor working in Wales and London in the 1920s and 30s. The novel was a global bestseller and its portrayal of a largely ineffective, corruption-ridden system of healthcare is thought to have directly influenced the foundation of the National Health Service in 1948. The Citadel anticipates such phenomena as evidence-based medicine and continuing medical education. This paper argues that the novel was never intended as propaganda for a state-controlled national health service. On the contrary, Cronin was against state control. Analysis of the novel is informed by recent biographical revelations about Cronin and the blurring of the margin between fact and fiction in Cronin's life and work is examined. Keywords AJ Cronin, The Citadel, Adventures in Two Worlds, National Health Service, tuberculosis Declarations of Interests No conflicts of interest declared. J. Cronin The Citadel First editionAuthorA. J. CroninCountryUnited KingdomLanguageEnglishPublished1937Gollancz (UK) Little, Brown (US)Media typePrint (hardback & paperback)Pages446 pp. (UK hardcover)ISBN0-450-01041-4 The Citadel is a novel by A. J. Cronin, first published in 1937, which was groundbreaking in its treatment of the contentious theme of medical ethics. It has been credited with laying the foundation in Britain for the introduction of the NHS a decade later.[1] In the United States, it won the National Book Award for 1937 novels, voted by members of the American Booksellers Association.[2] For his fifth book, Dr. Cronin drew on his experiences practising medicine in the coal-mining communities of the South Wales Valleys, as he had for The Stars Look Down two years earlier. Specifically, he had researched and reported on the correlation between coal dust inhalation and lung disease in the town of Tredegar. He had also worked as a doctor for the Tredegar Medical Aid Society at the Cottage Hospital, which served as the model for the National Health Service. Cronin once stated in an interview, "I have written in The Citadel all I feel about the medical profession, its injustices, its hide-bound unscientific stubbornness, its humbug... The horrors and inequities detailed in the story I have personally witnessed. This is not an attack against individuals, but against a system." Plot summary In October 1924, Andrew Manson, an idealistic, newly qualified doctor, arrives from Scotland to work as assistant to Doctor Page in the small (fictitious) Welsh mining town of Drineffy (Blaenelly is the name given in some adaptations). He quickly realises that Page is unwell and disabled and that he has to do all the work for a meagre wage. Shocked by the unsanitary conditions he discovers, Manson works to improve matters and receives the support of Dr Philip Denny, a cynical semi-alcoholic who, Manson finds out in due course, took a post as an assistant doctor after having fallen from grace as a surgeon. Resigning, he obtains a post as assistant in a miners' medical aid scheme in "Aberalaw", a neighbouring coal mining town in the South Wales coalfield. On the strength of this job, Manson marries Christine Barlow, a junior school teacher. Christine helps her husband with his silicosis research. Eager to improve the lives of his patients, mainly coal miners, Manson dedicates many hours to research in his chosen field of lung disease. He studies for, and is granted, the MRCP, and when his research is published, an MD. The research gains him a post with the "Mines Fatigue Board" in London, but he resigns after six months to set up a private practice. Seduced by the thought of easy money from wealthy clients rather than the principles he started with, Manson becomes involved with pampered private patients and fashionable surgeons and drifts away from his wife. A patient dies because of a surgeon's negligence, and the incident causes Manson to abandon his practice and return to his principles. He and his wife repair their damaged relationship, but then she is run over by a bus and killed. Since Manson has accused the incompetent surgeon of murder, he is vindictively reported to the General Medical Council for having worked with an American tuberculosis specialist, Richard Stillman, who does not have a medical degree, even though the patient had been successfully treated at his clinic. Stillman's treatment, that of pneumothorax, involved collapsing an affected lung with nitrogen, and was not universally accepted at the time. Despite his lawyer's gloomy prognosis, Manson forcefully justifies his actions during the hearing and is not struck off the medical register. Historical context The novel is of interest because of its portrayal of a voluntary contribution medical association which is based (not entirely uncritically) on the Tredegar Medical Aid Society for which Cronin worked for a time in the 1920s, and which in due course became the inspiration for the National Health Service as established under Aneurin Bevan. The Citadel was extremely popular in translation, being sold in book shops in the Third Reich as late as 1944. The scholar and Holocaust survivor Victor Klemperer noted, "English novels are banned of course; but there are books by A.J. Cronin in every shop
